

LOG Data Managers with DataCo Ltd

Location: Aberdeen

Exciting opportunities for experienced log data managers to join a rapidly expanding international data management company with plenty of opportunities for development.

Candidates are required to demonstrate good basic petrophysical knowledge, and experience in the following tasks:

- **Loading of data from various file and media formats to client databases and to CDA**
- **Verification of digital against hardcopy prints or digital images**
- **QC of raw digital MWD/LWD and wireline log data**
- **Editing and cleanup of MWD/LWD wireline logs**
- **Joining and depth-matching of log curves**
- **Population of client database with supporting meta data**
- **General database management and business support**
- **Provide statistics and reports measuring work progress**

The ideal candidate will:

- **Hold an earth science degree and, or have relevant industry experience, for example, log data management, mud logging, Wireline or MWD, petrophysics**
- **Have a good eye for detail**
- **Be highly motivated, with excellent interpersonal and technical skills**
- **Be proficient in Recall, OpenWorks, Geolog or similar**

The role will involve working in both the DataCo and Client offices.

You will receive a competitive package and training with the opportunity for progression in a company which is currently growing at 25% per year.

Please send your CV to info@dataco.co.uk

We thank all applicants for their interest. Only candidates selected for an interview will be contacted. DataCo is an Equal Opportunity Employer. This opportunity is open only to candidates eligible to live and work in the United Kingdom and the European Union.
